### **Part III DETAILED ACTION**

Claims 1-16 are currently pending.

#### **Restriction Requirement**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1,3-7, drawn to method for identifying a ion channel inhibitor, classified in class 435 , subclass 7.1.
- II. Claim 2, drawn to method of making a pharmaceutical composition, which is not classifiable because of indefiniteness of structure of the product.
- III. Claims 8-10 , drawn to dexametorphan derivative, classified in class 560, subclass 68.
- IV. Claims 11-13, drawn to a compound, which is not classifiable because of indefiniteness of its structure.
- VI Claims 14,15, drawn to computer system.
- VII. Claims 16, drawn to method for treatment of plurality of disorders, classified in class 514, subclass 762 . If elected, the Group will be further restricted.

The inventions are distinct, each from the other because of the following reasons:

Method of Group I is unrelated to products of Groups III, IV. The latter can be arrived at by plurality of methods of organic chemistry.

Method of Group I is unrelated to system of Group VI, and can be done without any computational systems., e.g., manually.

Methods of Groups I, II, VII are not connected in operation or effect, and have different modes of operation, different functions, and different effects.

Products of Groups III, IV are structurally and functionally different products which do not have any disclosed common core structure.

Product of Group IV and method of Group VII are related as product and process of use. The product as claimed can be used in a materially different processes such as prodrug derivatization.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and because of their recognized divergent subject matter, and the necessity for non-coextensive literature searches restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
